

Providing insight and critical data across your entire print fleet

## INTRODUCING PRINTALERTS

**P**rintAlerts is a unique all-in-one cloud based solution which remotely monitors and provides intelligence on your fleet of devices to help reduce operating costs, maximise resource usage and generate more profit. PrintAlerts assists your organisation with auditing clients' print volumes, accurate invoicing and providing proactive alerts for toner levels and errors.

PrintAlerts can handle virtually all printing devices from any manufacturer including multi-functional devices, networked and USB printers, copiers, 3D printers and large format plotters.

With PrintAlerts you can manage every brand of device in the same way and standardise the information received. PrintAlerts features a vendor neutral patented data collection agent (DCA) with no requirement for updates.

## CUTTING EDGE DASHBOARD

The PrintAlerts dashboard provides you with a central portal where you can manage all of your customers' devices. The dashboard provides you with instant information on device toner levels, maintenance issues and allows you to foresee requirements for your fleet. The dashboard is accessible from anywhere on any device.

## PAGE COUNTS

PrintAlerts allows you to capture accurate counter readings without having to contact anyone, use any hardware devices or visit customer sites. You know exactly when pages are physically printed (excluding ones not released from the print queue) and use the smart filter engine to show the exact details you require. Cost per page invoices can be generated outside of your Enterprise Resource Planning system (ERP).

## COMSUMABLES ALERTS

You can set up alerts within PrintAlerts to email you when things go wrong or when items need replacing, such as ink cartridges and maintenance kits. These alerts allow you to ship consumables and parts just-in-time and decide how many days in advance you wish to be notified.

## DEVICE STATUS

Know the live status at any time of devices across your customer sites including page counts, levels of stock supplies, date of installation, when cartridges were delivered, days remaining for each item and the reports for wasted materials.

## CONTRACT SUMMARY

Access overviews in graphical format for each of your customer contracts/projects including wasted consumables, cartridges delivered, installations and much more. This information allows for a thorough analysis of your entire installed fleet.

## AUTOMATED BILLING REPORT

PrintAlerts allows you to schedule reports for client billing purposes which can be generated for equipment, initial counters, final counters and printed pages within a specified period.

## DEVICE MANAGEMENT

Remotely manage and identify the level of reliability of each device including when maintenance is due ensuring maximum up-time for your clients. This allows you to solve technical issues and proactively service your fleet before things go wrong.

## TRACK CARTRIDGE INSTALLS

Have the ability to understand if and when toner has been installed by your customer, know if it has been installed too early, identify toner abuse and track lost consumables. This all helps you reduce and control costs across your fleet of devices.

## UNIVERSAL CONNECTOR

PrintAlerts can link to virtually any Enterprise Resource Planning (ERP), service ticketing system and many other products including print management software.

## WHY PRINTALERTS

PrintAlerts allows you to increase business efficiency and maximise your profit and ultimately grow your business.

- Automate and improve business processes
- Receive accurate counter readings
- Accurately monitor ALL toner levels
- Identify new sales opportunities
- Solve technical issues proactively
- Invoice effectively and accurately
- Improve service level agreements
- Save staff time and reduce operating costs
- Rapid assesment of your fleet
- Maximise uptime - maximise clicks
- Prevent duplicate deliveries
- Eliminate waste of consumables
- Streamline stock levels
- Reduce inbound calls
- Automate efficient procedures and supply
- Gain intelligence simply by knowing more!
