

PaperCut simplifies print queue deployment

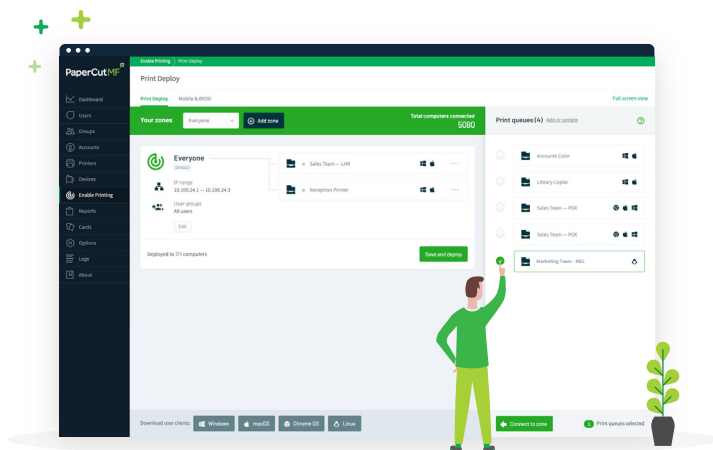

Get the right print driver and the right print queue to the right person in the right location, automatically. With PaperCut.

Print Deploy - PaperCut MF's newest feature - automates the time consuming, frustrating tasks of setting up print queues and deploying print drivers. And because it's PaperCut, it's done in the simplest, user-friendliest way.

Print Deploy is the answer to your print queue deployment needs.

Use Print Deploy when you:

- have multiple locations (e.g. branch offices, retail sites, campuses) with few IT resources on site
- have users moving between locations, needing access to printers on demand
- use serverless (direct) printing and want a simple way to deploy print drivers and print queues to your users
- have a mixed computer environment and want an easy way to enable printing on all of them (no matter the operating system or end-user permission level)
- don't have computers joined to a local domain (e.g. G Suite or Microsoft Azure AD)

7 ways Print Deploy reduces your IT support woes

- 1. Saves you time** by deploying queues and drivers easily at scale
- 2. Reduces support tickets** with an automated solution that's no touch for end users, even as they move between sites
- 3. Saves money** on purchasing, maintaining, and supporting on-premise active directory just to deploy print queues
- 4. Reduces the effort** needed to deploy drivers and queues to Windows and Macs, Chromebooks* and Linux*
- 5. Creates value** with one complete solution for print management and print queue deployment
- 6. Removes risk** because it's from an organization with 20 years' experience in print management
- 7. Increases end-user productivity** with automated setup and printing that "just works"
