# Innovative management of **printers and toners**

No investment costs for hardware or software

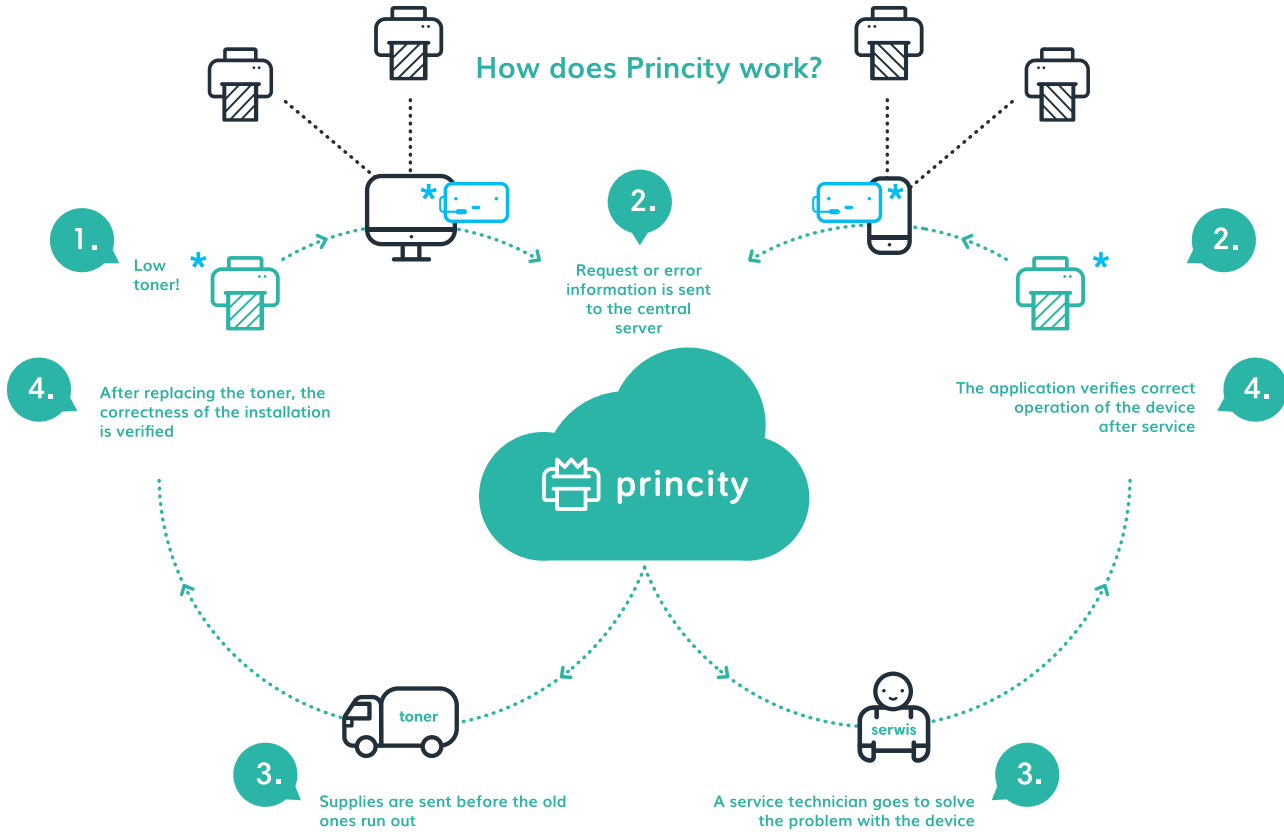

Access to the MPS knowledge base

Partner program

Princity helps  
companies reduce  
**up to 40%**  
of their printing  
costs.

## How does Princity work?

---

Complete insights  
about printers

---

Checks the amount  
of printed pages

---

Pro-actively orders  
supplies

---

Detects crashes  
automatically

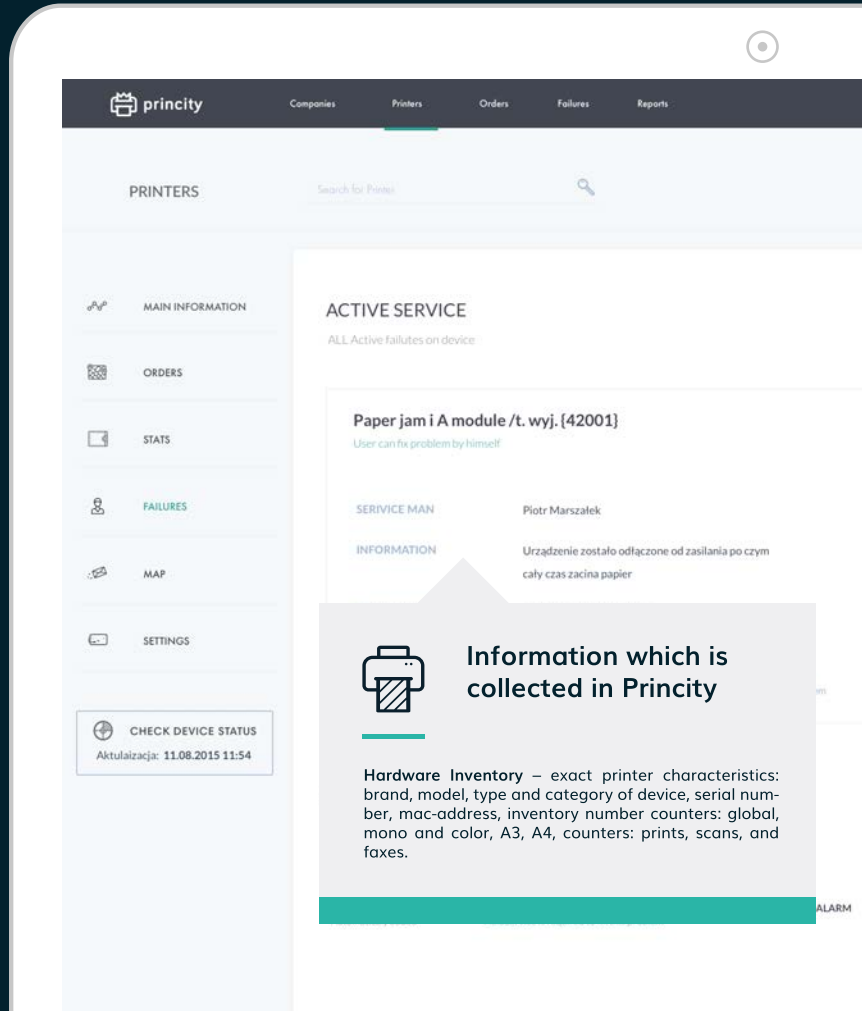

Why is it worth  
**installing Princity?**

# Management of the device in the cloud

Princity manages all print devices regardless of geographic location. Automatically detects all network devices, giving precise information on the state of your devices.

Princity supports network devices as well as devices locally connected.

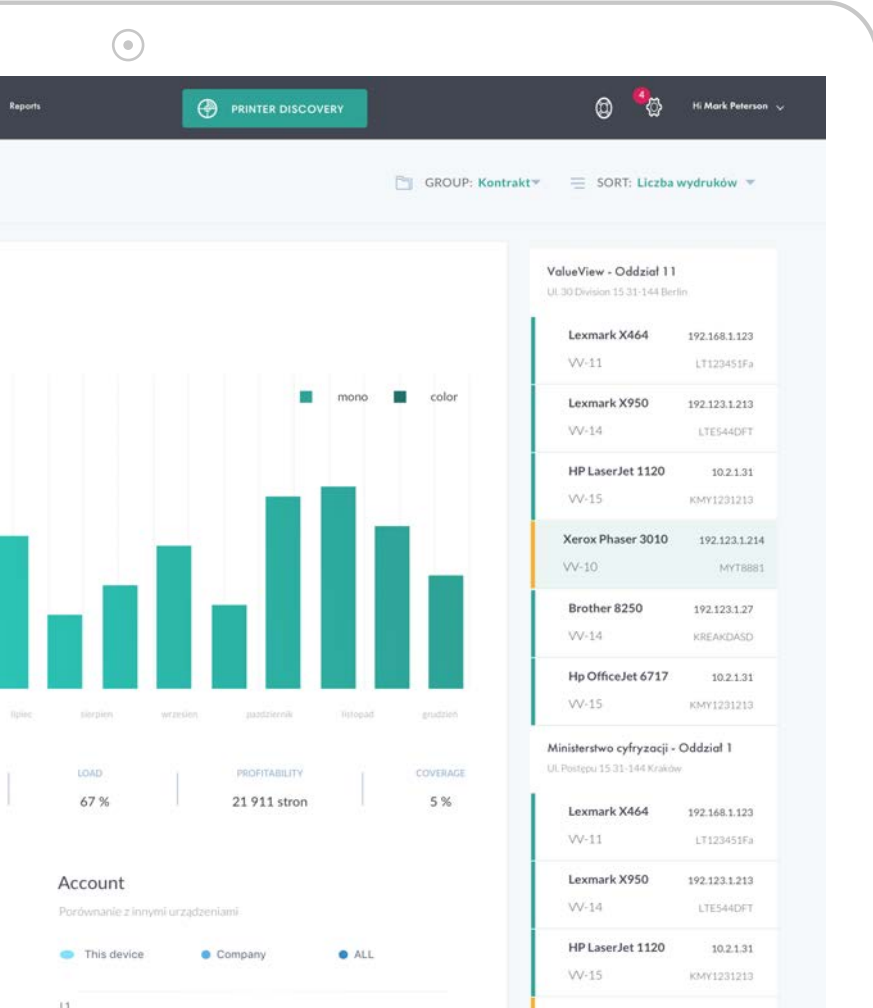

The screenshot displays the Princity web application interface. At the top, there is a navigation bar with the 'princity' logo and menu items: Companies, Printers, Orders, Failures, and Reports. The 'Printers' menu is currently selected. Below the navigation bar, the main content area is titled 'PRINTERS' and includes a search bar labeled 'Search for Printer'. A sidebar on the left contains several menu items: MAIN INFORMATION, ORDERS, STATS, FAILURES, MAP, and SETTINGS. A 'CHECK DEVICE STATUS' button is visible at the bottom of the sidebar, with a timestamp 'Aktualizacja: 11.08.2015 11:54'. The main content area shows an 'ACTIVE SERVICE' section with the heading 'ALL Active failures on device:'. A specific alert is displayed: 'Paper jam i A module /t. wyj. {42001}' with the note 'User can fix problem by himself'. Below this, the 'SERVICE MAN' is listed as 'Piotr Marszałek'. The 'INFORMATION' section states: 'Urządzenie zostało odłączone od zasilania po czym cały czas zaczyna papier'. A callout box in the bottom right corner, featuring a printer icon, is titled 'Information which is collected in Princity' and lists the following data points: 'Hardware Inventory – exact printer characteristics: brand, model, type and category of device, serial number, mac-address, inventory number counters: global, mono and color, A3, A4, counters: prints, scans, and faxes.'

## Information which is collected in Princity

**Hardware Inventory** – exact printer characteristics: brand, model, type and category of device, serial number, mac-address, inventory number counters: global, mono and color, A3, A4, counters: prints, scans, and faxes.

## Settlement printed pages

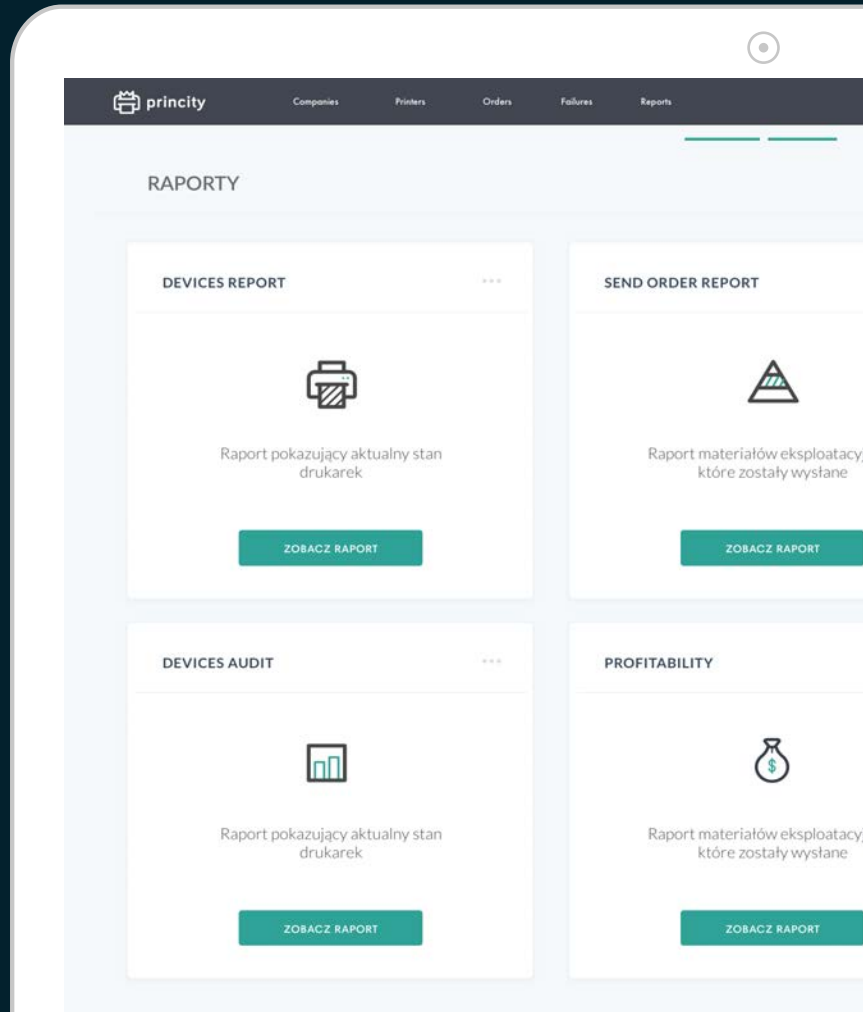

Princi measures printed pages on devices. Calculates costs and assigns them to location and MPK. As the only one tool can calculate print on networked devices and connected locally.

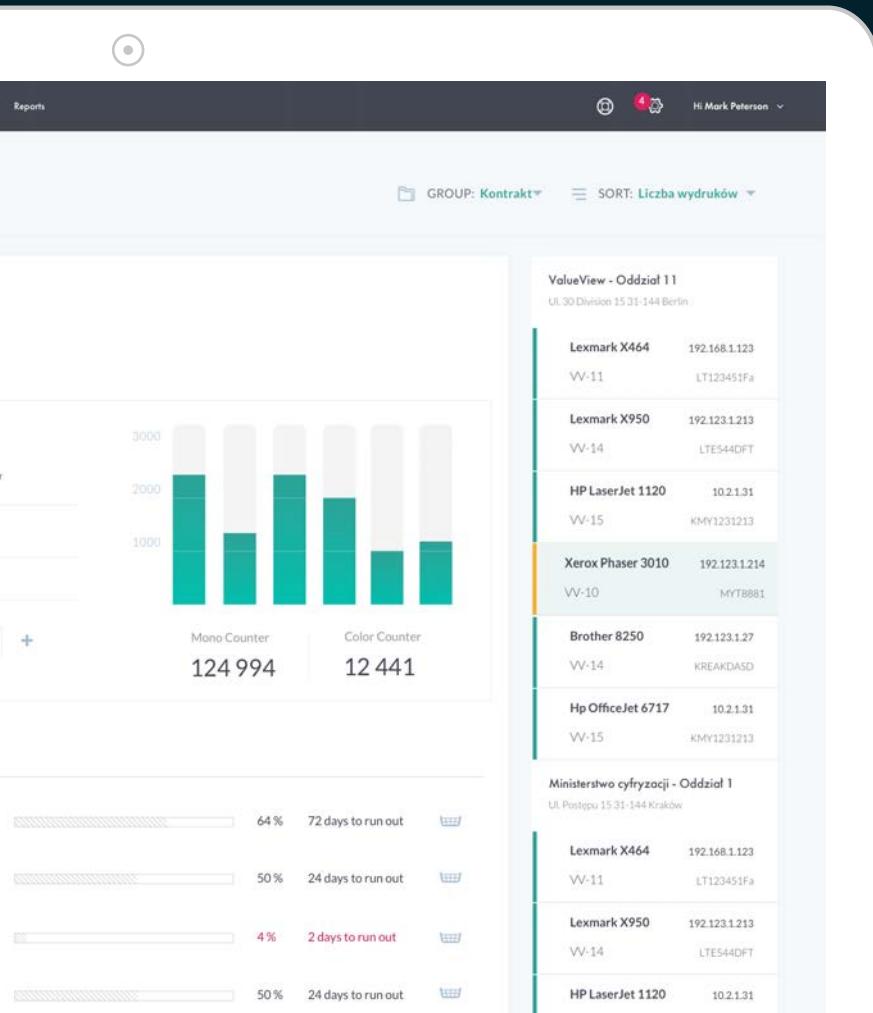

## Proactive delivery supplies

Algorithms implemented in Princy help automatically order new supplies before the previous ones run out. Integration with the shipping companies means information about where your material is located can be accessed immediately.

## Management of failures

Princity detects device and supply failures and gives the exact error code.

## How does Princity reduce printing costs?

Total consumption of supplies saves up to 20% of their purchase costs.

- Princity allows you to choose and purchase the optimal supplies. This reduces printing costs by up to 30%.
- Princity reduces service costs by more than half due to fast diagnosis, information about the cause of the failure and the need to call for service. An extra employee to support printing devices is not needed.
- Princity will highlight the most overloaded and expensive equipment.

## We support all devices on the market specific in a unique way

We create a unique mechanism for each model family in order to  
download data from printers. We currently support over

**5000 printers**

both network and local.

Canon

XEROX.

brother

KYOCERA

EPSON

RICOH

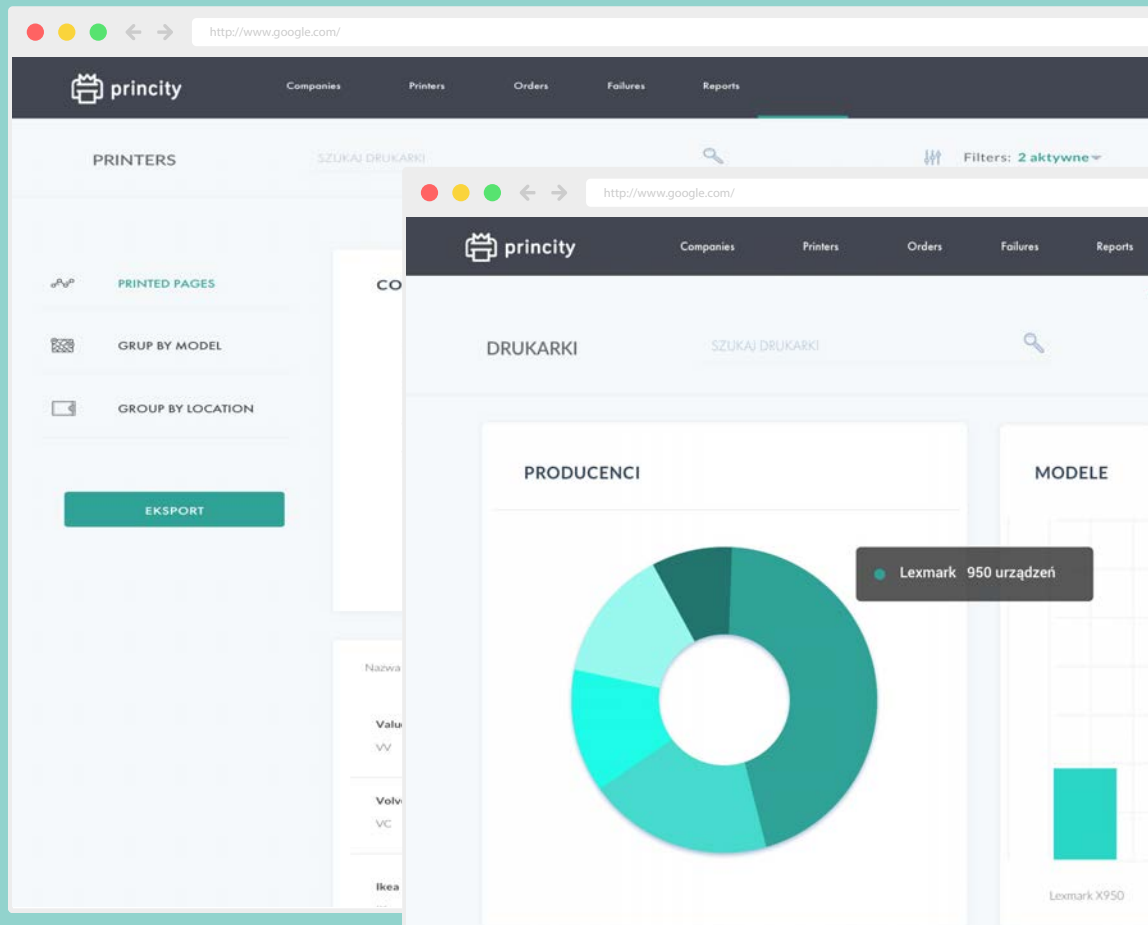

SHARP

# Advanced reports

30

reports will help you in efficient printing management

## Other functionality

Princity allows you to fully modify the look and feel of the application. Princity can also work on your server and under your domain.

Advanced filtering

Secure web hosting

Audit of the institution

Flexible price model

Graphic arrangement

## API for easy integration with Princyty

Princyty open APIs for easy integration with accounting systems and storage systems. Princyty perfectly matches your infrastructure.

## Security

The connection between the Agent application and the server is secured using TLS with two-sided authentication. The Agent Setup comes with a set of X509 \*\* based authentication credentials.

Princity data is stored on Microsoft Azure servers so you can be 100% sure of service availability and security of information storage.

## Partners program

The partners program is for firm that sells printers and supplies. With Princity you can offer your customers a unique service.

### What does Princity give:

- **White Label** solution: Your customers see only your logo and branding.
- Increased sales of consumables and customer relationships.
- Settlement per printed page.
- Integrate the solution with your own supplies store.
